Address: P.O Box 20603, Wamba

Professional Summary

Highly motivated and dedicated individual with experience in wildlife conservation and community engagement. Proficient in data collection, analysis, and fieldwork management. Skilled in communication, problem-solving, and teamwork. I'm a passionate full-stack developer with expertise in both front-end and back-end technologies. I enjoy building dynamic and efficient applications that solve real-world problems. Apart from development, I'm a tech enthusiast, always exploring new trends and innovations in the industry. Passionate about promoting coexistence between humans and wildlife.

Educational Background

Sept 2023 – Dec 2027 Bachelor of Information Science
Jomo Kenyatta University of Agriculture and Technology, Kiambu

Jan 2019- Dec 2022 St Peter and Paul Baawa Boys'
Mean grade attained C+

Work Experience

June-Aug 2024 Research Assistant Intern, *Grevy's Zebra, Samburu*

Responsibilities

Research Department

- **Field Monitoring of Grevy's Zebras:** Conducted field surveys to monitor Grevy's zebra populations. This included observing their behavior, tracking their movements, and recording data on their interactions with the environment.
- **Mapping:** Conducted mapping activities in Meibae Conservancy, which involved creating detailed maps of the area to support conservation planning and land management.
- **Data Entry and Cleaning:** Performed data entry tasks using Excel, ensuring accurate recording of field data. I also engaged in data cleaning processes to correct errors and ensure the integrity of the data.
- **Data Analysis:** Engaged in data analysis using Excel and the Spatial Monitoring and Reporting Tool (SMART). Analyzed data trends to support conservation efforts and decision-making.
- **Earth Ranger Monitoring:** Utilized Earthranger software to monitor the

movements of collared Grevy's zebras. This tool was essential for tracking their spatial distribution and behavior

Rangeland Programme

Rangeland Training and Holistic Livestock and land Management: Participated in training sessions on rangeland management and holistic land management practices. These sessions provided insights into sustainable land use and its importance for wildlife conservation.

Conducted forage assessments by measuring grass cover in each block of a given mapped area. This helped in evaluating the availability of food resources for both livestock and wildlife. This method is also used to estimate duration of pasturing by livestock in relation to the number of cattle to the amount of pasture.

Jan - Aug 2023 Research Assistant Intern, *Ewaso Lions, Samburu*

Responsibilities

Research Department

- Data entry on various data including lion sightings, human-wildlife conflicts, and rainfall data.
- Assisted in data analysis and interpretation, contributing to research reports
- Provided administrative support, including typing and data entry tasks.
- Conducted field patrols to monitor lion populations and mitigate human-wildlife conflicts.

Mama Simba Programme

- Conducted weekly educational sessions with Mama Simba Programme participants.
- Assisted Mama Simba Programme in documentation and reporting, including daily updates and program evaluations.
- Supported Mama Simba in survey data collection and conservation efforts.

Camp Management

- Maintained cleanliness and organization of the research office, guest accommodations, and communal areas
- Assisted in kitchen operations, including food preparation, cleaning, and organization.
- Oversaw camp activities and logistics, ensuring participants' safe and enriching experiences.

Lion Kids Camp Programme

- Conducted pre- and post-camp evaluations to assess program effectiveness and identify areas for improvement.
- Facilitated conservation games and educational activities, promoting coexistence and conflict resolution.

- Educated children in the community about the importance of wildlife conservation.

Kura Pride Programme

- Participated in vaccination campaigns, assisting with data collection, vaccination procedures, and community outreach efforts.

Skills

Technical Skills:

- Proficient in CSS and HTML
- Competent in Web Development using Python with Django framework
- Competent in using advanced Excel for analysis and building graphs
- Familiarity with data analysis software like R Studios software.
- Competent in data mapping with ArcMap and QGIS software.

Soft Skills:

- Strong fieldwork abilities
- Effective communication skills
- Excellent teamwork capabilities

Trainings

DevFest Hackathon – Google | Jamhuri, Nairobi

Attended the DevFest Hackathon organized by Google, where I collaborated and networked with tech professionals from various countries. Gained valuable insights into emerging technologies, problem-solving, and innovation through hands-on experience. Enhanced my technical skills and broadened my knowledge in the tech ecosystem.

Community-Based Conservation Engagement (CBCE) Workshop: Participated in a 9-day Community-Based Conservation Engagement (CBCE) Workshop focused on building community conservation success. Developed skills in experimental design, survey creation, and social science methods, including systematic and random sampling. Conducted fieldwork in Sasaab, interviewing elders, women, and youth on community interventions to enhance the community's valuing of Grevy's zebras. Completed data entry, cleaning, and coding using Google Sheets, and analyzed data from eight zones using R, T-tests, and chi-square to provide insights for conservation planning.

Certifications

- Certified in Cisco Computer Networking.
- Certified in eMobilis as Full stack Developer.

Languages

- Kiswahili: Proficient
- English: Intermediate

• French: Basic
